Modelado

Resultados del modelado

Modelo antes de realizar el análisis de los datos.

Supervivencia ~ cámaras + frecuencia min + R + Tiempo desde implante + voltaje batería + STIMA + STIMVI + STIMVD + Choque + ATP + Episodios

Modelo

Modelo tras realizar el análisis de los datos.

Supervivencia ~ Tiempo desde implante + voltaje batería

Método

Training set

30% datos

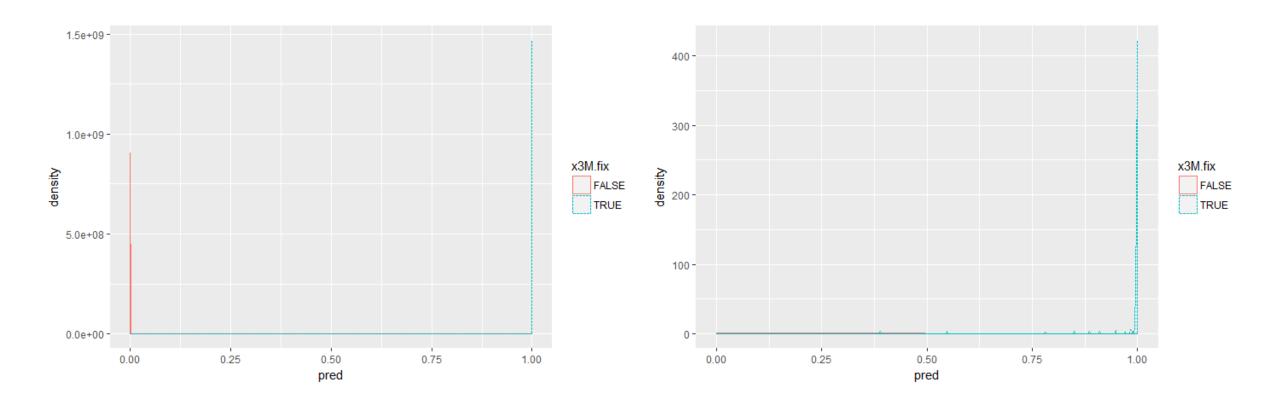

Usados para entrenar el modelo

Test set

70% datos

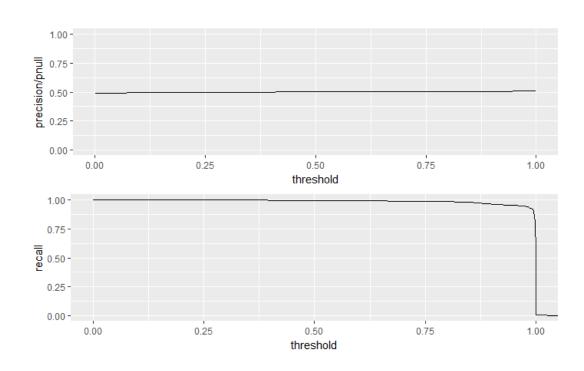

Usados para medir la eficacia del modelo

Modelado para los 3 meses
